

CxC Router by Convergia | Wireless Network Backup

WHY CxC Router?

Avoid network outages with primary or backup LTE connectivity; integrate seamlessly with existing infrastructure protecting your connectivity 24/7.

With a wireless connection, your business can seamlessly and immediately switch from a disrupted wired connection to an always-on, high-speed, low-cost standby connection. This is optimal for distributed

connections. Without a secure connection, loss of productivity and an increase in unexpected, unnecessary costs add up quickly. Whether paying workers who no longer have tasks to complete, damaging your reputation, or missing the opportunity to complete sales transactions, you can't afford to operate without a reliable connection.

HOW DOES IT WORK?

Convergia's CxC Router provides your company with a highly reliable, secure wireless failover solution.

Failovers allow your company to switch to a redundant or standby internet connection, that is activated if the primary connection fails.

SOLUTION FEATURES

- No Hardware Purchase, low month fee
- Convergia SD-WAN compatible for:
 - Low latency network failover
 - Traffic Shaping and QoS
- API for Managed Service Integration
- Zero Touch Connectivity
- Dual SIM for Operator redundancy
- PCI/HIPPA Compliant
- 4G LTE High Data SIM with Multi-Operator
- Remote Cloud Management
- Network Control and Monitoring

COMPETITIVE ADVANTAGES

Administration Portal

One platform for lifecycle management to control, inspect and order all.

Easy SIM Inventory Control

One SIM Card for worldwide coverage at local rates. No Need to order from Multi-Vendors.

24/7/365 Support

Support from a real person who speaks your language.

Secure and Private Network

Protect your connected products with our access point name (APN) or virtual private network (VPN).

Build us Into Your Products

Connectivity by Convergia API accelerates SIM life cycle integration.

Global CxC SIM Card

Works on the largest and best cellular operators around the world. Connect your products over any 2G, 3G, 4G LTE, NB-IoT
